Experience

Web Developer Intern   Feb. 06, 2023 – May 03, 2023
B&D It Consultancy   bditconsultancy.com

- Collaborated closely with a skilled team of developers to design, build, and maintain dynamic web applications, leveraging tools like the Live Share extension in Visual Studio Code for collaborative coding sessions. To ensure efficient version control and project tracking, commits and contributions were managed through a single GitHub account due to internet problems.
- Conducted rigorous testing and executed meticulous debugging of web applications, ensuring seamless performance and functionality across different platforms and devices.
- Addressed technical challenges in real-time, implementing solutions that improved application responsiveness and minimized loading times, resulting in increased user satisfaction.
- Utilized cutting-edge technologies, including Laravel Livewire and Bootstrap, to develop responsive and user-centric web pages, enhancing the overall user experience. Additionally, we also contributed to the enhancement of their information site, resulting in improved user accessibility and engagement. The source code for these projects can be found on my GitHub repositories.

Projects

Personal Data Sheet System for public school teachers | C#, MySQL   2019

- Assisted Nite Guerrero in the development of the Personal Data Sheet System for the School Division Office - Muntinlupa project, contributing to software code creation and feature enhancement.
- Played a significant role in identifying and addressing bugs through thorough code analysis and systematic testing, ensuring the software's stability and reliability.
- Demonstrated strong problem-solving skills by implementing solutions that enhanced existing software features, contributing to the project's overall progress.
